

Futuristic VIP Lounge at Cape Town Airport

The construction of the new VIP Lounge at Cape Town Airport has led to a unique HoloPro™ installation: six large-format screens with embedded 40" HoloPro™ 4 films make up the walls of the new smoking lounge.

With its good air conditioning and ventilation, smokers can smoke in an almost smoke-free atmosphere while waiting for their flights. The HoloPro™ screens display the flight information on clear glass.

The retail suppliers Todwil constructed this sophisticated lounge and our South African dealers expotech successfully completed the installation.

Kudos!

New: the pronova company folder

We have designed a new company folder for our successful campaign for new business partners, which focuses more on pronova itself. It may also be interesting for you to find out more about us in this folder, which we have attached to this newsletter.
