

Multimedia reception:

HoloPro™ at the third largest financial service provider in the USA

HoloPro™ has recently been providing a special kind of reception at Wachovia Securities: an 84" HoloPro™ screen, embedded in the glass front of the reception area, is both eye-catching and informative. Customers and potential customers are welcomed with news and information from the world of finance.

Wachovia Securities is one of the biggest financial service providers in the USA.

This HoloPro™ application was provided by the G+B pronova distributor Brookview Technologies for the headquarters in Downtown Charlotte, North Carolina
