

Impressive Foyers, Entrances, and Receptions

Campbell Insurance Group
Project by Tel Systems, Michigan (USA)

This 50" HoloPro™ screen, integrated into a 2-metre-high non-mirrored glass screen, welcomes and informs visitors.

Project by US/Canada Distributor Brookview Technologies, Inc.

Bavarian Football Association in Munich

Visitors are welcomed – and passers-by informed about current events and news – on a 67" HoloPro™ screen.

Prepared and installed by G+B pronova GmbH and exact planwerk GmbH.

Receiving visitors at the Feldschlößchen Brewery, Switzerland.

Here, 50" HoloPro™ films have been laminated into two 2.15m-high glass steles and installed to the right and left of reception to inform and welcome visitors.

Prepared and installed by our Swiss dealers decatron AG.

Roman Museum at Göglingen

When the old Town Hall at Göglingen was converted to a Roman museum, a 50" HoloPro™ was used externally as a "shop window" for presenting selected exhibits.

Planned and installed by G+B pronova GmbH and exact planwerk GmbH.

"The Prudential Eye"

In the visitors' lounge at the British financial company Prudential Group, visitors are presented impressively with information by this holographic work of art, which is 4m wide and 1m high.

This work of art was assembled by the British media company Cogapp and installed by our British dealers amvida. This was all done in close cooperation with technicians from G+B pronova GmbH.

Foyer of the BBC

A 60" HoloPro™ screen is very present in the BBC reception area. In this case, the projector could be integrated into the compact housing perfectly in terms of shape.

Designed and installed by our British dealers Visual Planet.

British Council Trafalgar Square

Two HoloPro™ films were embedded in a movable glass dividing wall. When the projection is running, the pictures attract attention and the discussions going on behind the screen continue undisturbed.

Conception and implementation by Visual Planet, Cambridge.

Chesna Citation Shares

Here, customers' waiting time is spent more pleasantly watching informative films on a 50" HoloPro screen, laminated into a glass wall.

Project by US/Canada Distributor Brookview Technologies, Inc.

Wachovia Securities

Here, the credo is information around the clock. Visitors and passers-by are informed on a 50"-HoloPro™ screen.

Project by US/Canada Distributor Brookview Technologies, Inc.

Visitors' waiting area at NASDAQ, New York City

Here, two 50" HoloPro™ screens were embedded in room-high glass elements. The projections always keep the waiting visitors up to date.

Project by US/Canada Distributor Brookview Technologies, Inc.

If you are interested in redesigning your reception area or visitors' lounge or corner, we would be glad to help you in your search for ideas.
